

ISO/IEC 27001 INFORMATION SECURITY MANAGEMENT SYSTEM (ISMS) UNDERSTANDING & IMPLEMENTING

Duration: 2 Days

PROGRAM OVERVIEW

Security of a country is very much depending on the security features applied by its national defense forces which are the air forces, armies and navies. For the sake of the nation's safety and security, it is very crucial for these defense forces and their many suppliers and vendors to understand and apply all the security features in safeguarding the country crucial information by applying the minimal requirements within an international recognized standard of ISMS such as ISO/IEC 27001.

This international standard contains requirements for the purpose of defending information of an organization from unauthorized access, use, disclosure, disruption, modification, perusal, inspection, recording or destruction. This standard was developed by the information security experts from all over the world and has undergone established and transparent processes at ISO.

This 2-day course describes the concept of ISMS, in establishing, implementing, reviewing, and continually improving the ISMS within an organization. The training methods shall be in the form of lectures, discussions and workshops.
