

CERTIFIED WELDING TECHNOLOGY PROGRAMMES

SHIELDED METAL ARC WELDING (SMAW): 3G WELDER CERTIFICATION

Duration: 3 Days

PROGRAM OVERVIEW

This course will prepare the participants to demonstrate their skill in welding on plate up to vertical position using SMAW process to those procedures used in the structural steel, petroleum pipeline, sheet metal and chemical refinery welding industries.

OBJECTIVES

This course will prepare the participants to demonstrate their skill in welding on plate up to vertical position using SMAW process to those procedures used in the structural steel, petroleum pipeline, sheet metal and chemical refinery welding industries.

COURSE CONTENTS

- Safety and Health in Welding Environment
- SMAW Welding Process and Equipment,
- Welding Consumables
- Welding Defects
- Introduction to Mechanical Testing and Method of Destructive Test
- Practical and Test

WHO SHOULD ATTEND?

- Supervisors
- Foremen
- QA/QC Personnel
- Welders
