

ISO/IEC 27017:2015 & ISO/IEC 27018:2019 INTRODUCTION

Duration: 2 Days

PROGRAM OVERVIEW

Nowadays, many people rely on cloud services for storage space, computing power or even application software for personal and commercial purposes. Besides the benefits that are offered by the clouds, it comes also with the risks of unauthorised access, lost and misused of data including personal data. Therefore, it is very important for the service providers to implement the minimum controls according to ISO/IEC 27017 and ISO/IEC 27018 to ensure that the data hosted within clouds are sufficiently protected. ISO 27017 demonstrates cloud security to users in general, while ISO 27018 specifies the requirements of securing personal data at clouds. This training provides an overview of requirements and controls within the two standards.

OBJECTIVES

- To understand the cloud service activities
- To understand the threats affecting the data that are hosted at cloud services
- To understand the requirements and controls within the standards in general

COURSE CONTENTS

- An overview on the concepts of cloud services and how to protect the data hosted by Cloud Service Providers
- An overview on the controls required within ISO 27002:2022, ISO 27017:2015 and ISO 27018:201

WHO SHOULD ATTEND?

Management, Technical staff, Quality staff, Document Officers & Risk Officers of:

- Cloud Service Providers
- Cloud Users
- Authorities & Statutory Bodies

SIRIM Academy

3rd Floor, Building 3, SIRIM Complex
1, Persiaran Dato' Menteri
PO Box 7035, Section 2
40700 Shah Alam
Selangor
